The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

Atico Mining Corporation (the “Company”) was incorporated in the Yukon Territories on April 15, 2010 and continued to British Columbia on October 4, 2011. The Company is engaged in the acquisition, exploration and development of mineral projects in Colombia and elsewhere in Latin America. The address of its head office is Suite 501 - 543 Granville Street, Vancouver, British Columbia, Canada.

The Company completed its initial public offering (“IPO”), where it issued 23,000,000 common shares of the Company at $0.50 per common share for gross proceeds of $11,500,000 (Note 9) and the common shares of the Company began trading on the TSX Venture Exchange on March 13, 2012 under the symbol “ATY”.

Currently, the Company has an option to acquire 90% of the issued and outstanding shares of Minera El Roble S.A. (“MINER”), the owner of the El Roble Mine, a copper-gold mine in Colombia.

In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of material uncertainties relating to events or conditions that may cast significant doubt upon the entity’s ability to continue as a going concern.

These consolidated financial statements of the Company are presented in Canadian dollars unless otherwise indicated. The consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. The ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and to develop profitable operations. The consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation and measurement

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”) using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). These condensed consolidated interim financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The condensed consolidated interim financial statements of the Company have been prepared in accordance with the same accounting policies and methods of their application as the most recent audited financial statements for the year end December 31, 2011, except that they do not include all note disclosures required for annual audited financial statements. These condensed consolidated interim financial statements should be read in conjunction with the annual audited financial statements.

Fair Value

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

a) Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
b) Level 2 - Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
c) Level 3 - Inputs for assets and liabilities that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The carrying value of receivables and accounts payable and accrued liabilities approximated their fair value because of the short-term nature of these instruments.

As at September 30, 2012, the Company's financial instruments measured at fair value are as follows:

Financial Assets	Level 1	Level 2	Level 3	**Total**
Cash	$ 5,020,741	$ -	$ -	$ 5,020,741

Risk and Capital Management

The Company's capital includes share capital and the cumulative deficit. The Company's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company may issue new shares in order to meet its financial obligations.

The Company's activities expose it to a variety of financial risks; market risk (including currency risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Company.

This note presents information about the Company's exposure to each of these risks, the Company's objectives and processes for measuring and managing risk, and the Company's management of capital. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in both Canada and Colombia and incurs expenditures in currencies other than Canadian dollars. Thereby, the Company is exposed to foreign exchange risk arising from currency exposure. The Company has not hedged its exposure to currency fluctuations.

As at September 30, 2012, the Company is exposed to currency risk through the following assets and liabilities:

	US dollars	Colombian pesos	Total
Cash	$ 2,225	$ 69,058,772	
Receivables	-	240,734	
Accounts payable and accrued liabilities	(14,608)	(563,902,516)	
Net exposure	(12,383)	(494,603,010)	
Canadian dollar equivalent	$ (12,183)	$ (270,793)	$ (282,976)

Based on the above net exposure as at September 30, 2012, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the US dollar and Colombian peso would result in an increase/decrease of approximately $28,298 in the Company's pre-tax earnings (loss).

Interest rate risk

As the Company does not have significant interest-bearing assets, the Company's income and operating cash flows are not significantly affected by changes in market interest rates. As at September 30, 2012, the Company did not have any interest-bearing loans.

Credit Risk

Credit risk arises from cash and deposits with banks, as well as credit exposure to customers, including outstanding receivables and committed transactions.

There is no significant concentration of credit risk other than cash deposits. The Company's cash deposits are primarily held with a Canadian chartered bank. The Company has minimal accounts receivable exposure.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and availability of funding through an adequate amount of committed credit facilities and the ability to pay obligations as they fall due. Financial liabilities, as at September 30, 2012, included $362,498 of accounts payable and accrued liabilities that have expected maturity dates of less than one year from September 30, 2012. Balances due within 12 months equal their carrying balance as the impact of discounting is not significant.

The Company is currently considering funding options that are available including raising additional funds from institutional investors and/or current shareholders and is confident that funding will be available to meet the final work program.
