

## **Atico Reports Consolidated Financial Results for the Second Quarter of 2018**

*(All amounts expressed in US dollars, unless otherwise stated)*

Vancouver, August 14, 2018 -- Atico Mining Corporation (the “Company” or “Atico”) (TSX.V: ATY | OTC: ATCMF) today announced its financial results for the three months ended June 30, 2018, posting a net income of \$2.8 million.

Fernando E. Ganoza, CEO and Director, commented, "We are pleased to report a strong second quarter and first half of the year. The Company showed improvements in earnings and working capital over the same period last year while remaining on schedule to fully repay the senior debt facility during this fiscal year. Mr. Ganoza continued, "For the second half of this year, we will continue focusing on cost control initiatives to reduce operating costs while also advancing on our regional and underground exploration drill programs."

### ***Second Quarter Financial Highlights***

- Net income for the three months ended June 30, 2018 (“Q2-2018”) amounted to \$2.8 million, compared with \$0.6 million for the same period last year (“Q2-2017”). Net income for the period was positively affected by an increased amount of concentrate shipped and provisionally invoiced and higher average realized copper and gold prices as compared to Q2-2017.
- Sales for the period increased by 45% to \$20.4 million when compared with Q2-2017. The increase was due to increased amount of concentrate shipped and provisionally invoiced and higher average realized copper and gold prices as compared to Q2-2017. Copper (“Cu”) and gold (“Au”) accounted for 94.7% and 5.3% of the total amount provisionally invoiced during Q2-2018. The average realized price per metal on provisional invoicing was \$3.16 (Q2-2017 - \$2.63) per pound of copper and \$1,297.33 (Q2-2017 - \$1,248.83) per ounce of gold.
- Working capital was \$6.8 million (December 31, 2017 - \$4.6 million), while the Company had long-term loans payable with \$1.0 million (December 31, 2017 - \$2.7 million) outstanding at the reporting date.

- Cash costs<sup>(1)</sup> were \$136.74 per tonne of processed ore and \$1.67 per pound of payable copper produced<sup>(2)</sup>, increases of 19% and 28% over the same period last year, respectively.
- Income from operations was \$4.9 million (Q2-2017 - \$2.3 million) while cash flow from operations, before changes in working capital, was \$5.4 million (Q2-2017 - \$4.6 million). Cash used for capital expenditures amounted to \$3.8 million (Q2-2017 - \$2.9 million).
- At the end of the quarter, 8,017 (December 31, 2017 - 7,366) wet metric tonnes (“WMT”) of non-invoiced concentrate remained at the Company’s warehouses.
- All-in sustaining cash cost per payable pound of copper produced<sup>(1)(2)</sup> for Q2-2018 was \$2.24 (Q2-2017 - \$1.96).

## *Second Quarter Operations Review*

During the quarter, the Company produced 5.2 million pounds (“lbs”) of copper, 2,596 ounces (“oz”) of gold, and 10,014 oz of silver. When compared to Q2-2017, production increased slightly by 1.3% for copper and 1.0% for gold. In the case of copper, the 7.2% increase in processed material was partially offset by a 4.6% decrease in head grade relative to Q2-2017, while for gold a decrease of 2.4% in head grade and 3.7% in recovery almost completely offset the increase in processed material.

Cash costs<sup>(1)</sup> for the period were \$136.74 per tonne of processed ore, and \$1.67 per pound of payable copper produced, increases of 19% and 28% over the same period last year, respectively. The increase in the cash cost per pound of payable copper net of by products is mainly explained by a higher cost per processed tonne, partially offset by a higher content and value of gold. Most of the increase was driven by a higher expense in cemented backfill when compared to Q2-2017: an increase in cubic meters filled, partially offset by a decrease in the unit cost per cubic meter. All-in sustaining cash cost per payable pound of copper produced<sup>(1)(2)</sup> was \$2.24.

### ***El Roble Mine***

The El Roble mine is a high grade, underground copper and gold mine with nominal processing plant capacity of 800 tonnes per day, located in the Department of Choco in Colombia. Its commercial product is a copper-gold concentrate.

Since obtaining control of the mine on November 22, 2013, Atico has upgraded the operation from a historical nominal capacity of 400 tonnes per day.

El Roble has a measured and indicated resource of 1.87 million tonnes grading 3.46% copper and 2.27 g/t gold, at a cut-off grade of 0.93% copper equivalent. Mineralization is open at depth and along strike and the Company plans to further test the limits of the resource.

On the larger land package, the Company has identified a prospective stratigraphic contact between volcanic rocks and black and grey pelagic sediments and cherts that has been traced by Atico geologists for ten kilometers. This contact has been determined to be an important control on VMS mineralization on which Atico has identified numerous target areas prospective for VMS type mineralization occurrence, which is the focus of the current surface drill program at El Roble.
